## SKIN CONCEPT

SKIN CONCEPT = skin pulse

Skin Pulse Facial Concept offers an exfoliation step, a non-invasive way to needle the skin, and a facial toning vibration massage. The exceptional experience allows for enhanced product absorption and advanced facial techniques. Results are immediate.

MASSAGING DISC HANDPIECES  
NON INVASIVE FACIAL STIMULATION  
INVIGORATING AND REJUVENATING

In 10 minutes the stamping movement of 20 nylon needles revitalizes 520,000 hydration pathways in the skin.

## SKIN CONCEPT

Smoother Younger Skin!

### The Skin Pulse Skin Concept

During a Skin Pulse session 2,600 stamping movements stimulate 520.000 micro channels in the skin. To stimulate the epidermal and dermal skin functions it is not necessary to pierce the skin with metal needles. Our system uses blunt nylon crown heads that stamp the skin at high velocity. This new technology allows for no downtime or discomfort after the procedure.

Medispa's Skin Pulse Facial Concept has been designed to safely be used on all skin types without injury or bleeding. It can be safely used by a beautician without medical supervision. The treatment first starts with an oscillating micro-disc peeling to remove dead skin cells, and is then followed by two non-invasive needling techniques. Lift L is used on the full face and Lift S is used as a spot treatment on troublesome areas like crow's feet or fine lines around the mouth. The treatment is finished with a vibration massage that signals muscles toning allowing for tighter more supple skin. The face is left invigorated and energized with a noticeable improvement.

### SKINCARE WITH A PULSE

The Medispa Skin Pulse needling system comes complete with four handpieces, but it can be purchased with three handpieces as well. The micro-peel handpiece is designed to smooth the skin and remove dead skin cells from the face. The skin feels renewed and ready for the micro-channeling procedure. The Vibro Sulpt handpiece is designed to stimulate the skin and its functions by allowing deep vibrations to enter into the muscles and nerves for further facial enhancement. The experience feels like a fitness class for the face.
